

1.2 Environmental Policy

It is the Company Policy to value and satisfy customers and suppliers by providing high quality services including refrigeration, air conditioning and energy management.

Our Environmental Policy is to be a responsible corporate citizen in protecting the environment. We are committed to complying with accepted environmental practices, including the commitment to meet or exceed applicable legal and other requirements, to strive for continual improvement in our environmental management system, and to minimise the creation of wastes and pollution. We will, therefore, manage our processes, our materials and our people in order to reduce the environmental impacts associated with our work.

Industrial Refrigeration Services pledges to implement and operate the ISO 14001 Environmental Management System to further enhance environmental performance. Our main objectives are to:

- Recycle all packaging materials
- Reduce, re-use and recycle all office waste
- Increase the environmental awareness of staff

This policy will be communicated to all parties interested in the performance of our environmental management system.
